

## **IN THE CLAIMS**

Claims 1-19 (Canceled).

20 (Currently Amended). A camera comprising:

a first optical path having a shutter and a lens with a first field of view;

a second optical path including a shutter and a lens with a second field of view  
different from said first field of view;

an image capture device to selectively receive an image from one of said first and  
second optical paths;

an eyepiece to display the image received by said image capture device; and

a beamsplitter to enable light from the selected optical path to be passed both to  
an imaging array and said eyepiece, said beamsplitter including a first surface to receive light on  
said first optical path, and a second surface different from said first surface to receive light on  
said second optical path.

Claim 21 (Canceled).

22 (Original). The camera of claim 21 wherein said shutters are controlled so that only  
one of said shutters is open at a time.

23 (Previously Presented). The camera of claim 22 including a controller to enable a  
user to select one of said shutters to pass light.

Claim 24 (Canceled).
